Q2 & H1FY26 Highlights

Business Highlights

H1FY26

**Rs 9,586 mn
Revenue**

**Rs. 946 mn
EBITDA**

**Rs. 155 Mn
PAT**

- During the H1FY26, Company achieved total revenue of Rs 9,586 mn, growth by 12% on YoY basis. This growth is led by sales from Basic Chemicals and additional sales from Benzene downstream products. The absolute EBITDA stood at Rs.946 mn, 27% growth on YoY basis. Interest, depreciation and other overheads have increased at company level on capitalization of Saykha's Benzene downstream project. On the other hand there was not significant contribution by this project at topline level during the quarter. Hence the increased overhead offset partial profitability of other divisions.
- Revenue from Dye intermediates grew by 2%, Dyestuff de-grew by 2% and Basic Chemicals, growth by 76% YoY due to increase in raw materials prices i.e. Sulphur followed by finished goods prices during the H1FY26. In Q2FY26, Revenue from Dye Intermediates stood at Rs.1,834 mn, grew by 7% quarterly on YoY basis, Revenue from Basic Chemicals stood at Rs.331 mn, grew by 42% quarterly on YoY basis, Revenue from Dyestuffs stood at Rs.1,322 mn, grew by 7% quarterly on YoY basis.
- During the H1FY26, Chlor Alkali business has reported revenue of Rs. 1,682mn, growth by 9% on YoY basis, led by comparative better realization on YoY basis. The revenue and volume remained in line on QoQ basis. We anticipate good performance from this division, supported by steady demand from end-use industries.
- The Sener Boya- Turkish, Chinese, BCTPL and Indonesian subsidiaries have performed overall satisfactory with positive earnings during the Q2FY26.
- In Saykha's the Benzene downstream products, company has started normal production with required quality norms, however margins continue to face pressure due to stiff competition and slower demand. This unit has started contributing to the topline in H1FY26. We are expecting gradual growth and meaningful contribution towards top and bottom-line by quarter-on-quarter basis.
- Improvement in volumes across divisions, stable and under control input raw material cost, will help us to enhance revenue and margins in the near term. The management's relentless cost-control measures have been helpful in sustaining growth during challenging time

Responding To Critical Issue

Key Challenges

- High costs involved in complying with environmental regulations. Moreover, the rising industrial water and power rates are a concern.
- Scarcity of water can lead to insufficient supply affecting our production needs.
- The Chemical Industry is energy and CO₂ intensive. It represents more than 30% of global Greenhouse Gas (GHG) emissions. If not controlled, it can have a profound effect on climate change

Our Response

- Abides by the mantra of reduce, recover and reuse' of natural resources
- Taken appropriate pollution control systems including implementation of Effluent Treatment Plants (ETPs), Multiple Effect Evaporator Plant (MEEP), Brine Treatment Plant and Effluent Spray Dryer Plant (ESDP).
- The Company possesses 5 MW Co-generation lignite-based & 1.73 MW steam (waste recovery heat) based captive power plant at Unit 7

Outcome

- Reusable clean water
- Zero liquid discharge
- Salt extracted through MEEP process is captively used or sold
- Cost optimization through proper management of the energy consumption
- Creating a better future for all stakeholders

Multiple Effect Evaporator Plant (MEEP)

Effluent Treatment Plant (ETP)

Key Focus Areas

- Eradicating hunger, poverty and malnutrition
- Promoting healthcare and sanitation including contribution to the Swach Bharat Kosh
- Promoting education and enhancement of rural infrastructure
- Ensuring environmental sustainability
- Providing funds for construction for drinking water pipelines Conducting regular health check-up camps
