

Meta Nitro Chloro Benzene

Meta Nitro Chloro Benzene (MNCB) is an organic compound. It is brown crystalline, which is mainly used as a precursor to other compounds due to its two functional groups. It is an essential building block in industrial synthesis.

DESCRIPTION:		APPLICATION:
CAS No:	121-73-3	+ PHARMA
ABBREVIATION	MNCB	+ DYES INTERMEDIATES

IUPAC NAME :	+ 1CHLORO-3-NITROBENZENE
CHEMISTRIES:	+ NITRATION
COMMON NAME:	+ MNCB
CHEMICAL FORMULA:	+ C6H4ClNO2
PACK SIZE:	+ TANKER, ISO TANK
PRODUCT FORM:	+ LIQUID
